What's a word cloud?
An attractive arrangement of randomly positioned words, where the most important words are bigger than the others.

What are they for?
Mostly for fun! ... and now you can print them automatically onto items: a great idea for making custom gifts! Plus they are fantastic at summarising large documents (reports, speeches, questionnaires, etc), teaching kids and more...

invention at play
Lemelson Center for the Study of Invention and Innovation

WANT TO PLAY?
Chuck Hoberman, Age 3

Explore the playful side of invention and the inventive side of play in *Invention at Play*. Learn how play—the ordinary and everyday “work of childhood”—connects to the creative impulse of both historic and contemporary inventors.

Invention playhouse
When asked what inspired them to become inventors, many adults tell stories about playing as children. In our virtual playhouses, you can set your own inventive thinking in motion.

Inventors' stories
The sciences humans develop through play—curiosity, persistence, imagination, communication, problem solving—have been and continue to be an important part of the inventor's tool kit. Explore the stories of inventors, both famous and little-known, whose creative habits of mind began in childhood play and resulted in a variety of useful contributions.

does play matter?!
How have attitudes toward play changed over time? What kinds of toys did inventors play with as children? Is the quality and quantity of children's play changing? If play is changing, how will that affect invention? Reflect upon these and other questions through video commentaries and toy displays.
